### Austria Preparing Note on Petrolite

Washington, Sept. 11.—Secretary Lansing said today that another communication from Austria-Hungary regarding the attack by an Austrian submarine upon the American oil tanker Petrolite was expected shortly. The state department has been informed that the new Austrian note is under preparation but not of its probable tenor. The United States demanded an apology, punishment of the submarine commander and reparation.

Gold coin to the amount of \$200,000 was withdrawn from the Sub-Treasury for shipment to Cuba.

### STOCK MARKET

New York, Sept. 11.—Opening-Reading was the only striking exception to the rising tendency on the resumption of trading today, other leaders and speculative favorites mounting above last week's final quotations. Reading's reversal of 2 1/2 points was soon largely recovered, however, while coppers, independents and the equipment and the paper issues registered gains extending from fractions to three points. United States steel opened with 10,000 shares up to 103 1/2 within a fraction of its maximum attained last Saturday. Shipping shares were represented by Marine preferred and Atlantic, Gulf & West Indies the latter at a new record.

Noon.—Apart from enormous trading, which exceeded 7,000 shares, the feature of the forenoon was the absolute neglect and relative heaviness of rails. Reading was the only issue of that group to show any prominence. Minor stocks of the non-dividend class participated in the rise, but steel, which repeated its record price of 103 3/8, and Marine preferred which broke all records at 125 5/8, were the conspicuous features. Metals, Mexicans and some equipments and munitions were 2 to 3 points higher. Bonds were irregular.

The Baireuth Festival. The Baireuth Festival theater was the dream of Richard Wagner's life. That he was able to carry it to fulfillment was largely the result of the cooperation and financial aid given by the unfortunate King Ludwig II. of Bavaria. Wagner first conceived the idea of his festival theater in 1858, but the foundation stone was not laid at Baireuth until May 22, 1872. The festival theater was opened with the Ring cycle in 1876. The festival then lasted from the 13th to the 17th of August. Since the first performance of "Parsifal" in 1882 there has been a music festival at Baireuth almost every year.—New York Times.

She Sent It Back. There have always been a lot of give and take in American women's social adventures in England. But American women have spirit, and if they have taken a good deal they have given back still more.

An Englishwoman some years ago called on an American countess in Belgravia. "Oh, I thought you were out! That's why I called," the Englishwoman said in her sweet, clear, insolent English voice. "Well, do you know, I thought I was out, too," the American replied. "My stupid man must have mistaken you for some one else."

Trees and Water. Trees having a large leaf surface exposed to evaporation require a correspondingly large root formation to supply the necessary moisture. It has been estimated that a full grown shade tree, such as the oak, maple or elm, bearing some 700,000 leaves transpires about 150 gallons of water daily. The loss of such a large amount of water requires that an equal amount be taken from the soil by the tree's roots. If this supply is not furnished the tree will die of thirst.—Tree Talk.

The Bahamas. The Bahamas make up their 4,996 square miles with 29 islands, 661 cays and 2,387 rocks. They have the distinction of being the first point of land in the western hemisphere discovered by Columbus, who sighted Cat Island on Oct. 12, 1492, and christened it San Salvador. In acknowledgment of his preservation, the islands were taken possession of by Sir Humphrey Gilbert in 1578, but no settlement was made till 1629. After changing hands once or twice the islands finally became British in 1783.—Westminster Gazette.

A Groomsman's Bequest. What is probably the strangest and at the same time the most horrible bequest ever made is to be found in the will of Lieutenant de Pap, formerly an officer in a smart regiment of Austrian hussars, who was executed by strangling some years ago for the murder of his brother.

Previous to his execution the murderer requested that he might be photographed while hanging on the gallows and a copy of the ghastly picture sent to his father.

Sudden Deaths. Mr. Dow met Mr. Duff with a bit of startling news. "Rather sudden that about Jones, wasn't it?" he said. "Died at 6 o'clock this morning."

Mr. Duff nearly collapsed. "Good gracious, you don't say so!" he said. "Why, I met him in the subway station last night, and—he was alive then!"—New York Times.

## BEGIN TESTS OF BRIDGEPORT MILK SUPPLY AT ONCE

### New Chemical and Bacteriological Laboratory Open in Bank Building.

Concurrent with the opening of the chemical and bacteriological laboratory of the Department of Health, in rooms 211, 12-13 of the First-Bridgeport National Bank building, 836 Main street, it was announced by Dr. Abraham Saphian that a beginning will be made at once of the tests of all milk coming to this city from outlying districts with a view to eliminating at once the health regulations in this city the standard set by the board.

Bacteriologist Laurence E. Poole, in charge of the research work, declared that this morning's test would include 25 samples taken from Bridgeport and the vicinity and some from as far as Copake, N. Y., a hundred miles distant. In opposition to the present plans, the County Grange has announced that it will consider complaints of milk producing farmers who declare that the health regulations in this city are designed to militate against the local farmers in favor of larger dealers. A mass meeting has been called for the night of September 18, at Hawleyville, when full discussion of the matter will be had.

Local health officials, including Dr. A. C. Knapp and Bacteriologist Poole, will attend the meeting. Dr. Poole said today that the plan of analysis as outlined by the department of health aimed to aid the local farmer rather than to put him out of business.

Under the plan now in force, careful analysis of milk for dirt, solids, fats and bacteria are made with a full report on the Babcock test. Beginning today farmers throughout the country will have mailed to them in envelopes the actual dirt taken from pints of milk, with a scale of the butter-fats which will show what the herds are actually producing, the specific gravity, solids and bacteria found. On January 1st, 1917, they will be given a report on their percentage and if below 75 per cent. will then be given until April 1, 1917, to remedy, or to sell only pasteurized milk.

It was asserted today that the laboratory was also open for the free reception of all physicians' samples of blood, sputum, etc., upon which reports immediately will be returned to the physicians. The work now to be done includes the Wassermann test.

The laboratory is divided into an ante-room and three working laboratories; one for infectious disease, or microscopic examination room; one for chemical analysis for the determination of bacteria, and the evaporator room.

The public will be admitted only into the ante-room which will be in charge of Miss Mary Kane, assistant to Dr. Poole. Others in the laboratory will be a stenographer and a cleaner.

The regular display of microscopes, cultures, agar gelatine, bouillon, pepton and sugars is present, but in this case they are not the harmless variety for in each there lurks the deadly germs of possible diphtheria, typhoid sore throat (streptococci) or other diseases.

In the evaporators were many samples in preparation for final analysis under the Wassermann, Schick, tubercle and other tests. Ice boxes to be used by a person might step were filled with milk.

Among the larger apparatus is a B. & L. microscope of 150 diameters oil immersion, Wisconsin dust tester, autoclave for sterilizing under 15 pounds pressure, steam sterilizer, hot air sterilizer and incubator. Babcock centrifugal is being installed.

No pathological work will be done in the laboratory.

## Tot Falls From High Window; Line Breaks His Fall

Five year old Simon Pareasis of 163 Andover street, miraculously escaped death yesterday afternoon when he fell from a window on the second floor of his home. A clothesline broke the force of his fall and he only suffered a slight laceration of the scalp. He was taken to the emergency hospital by his parents where Dr. J. P. Deery closed the gash.

## RUNAWAY GIRLS WANT TO RETURN HOME; PARENTS MAY NOT RECEIVE THEM

Expressing a desire to return to their homes in Pawtucket, R. I., Virginia Moran and Myrtle Tracy, two 18 year old girls arrested Saturday night by Detective John J. Seery may not be returned as it is reported here their parents have notified the Pawtucket police that they wish to have nothing more to do with the erring girls. They were taken into custody after being seen on the streets and in carbars in company with young men.

According to the stories told by the girls, a young foreigner has been following them around and has told the Tracy girl that he wants to marry her, or he will slash her cheeks. He has been warned by the police. The girls have been placed in charge of the probation officer, Mrs. Burgess.

The three-day carnival of the Far Rockaway Mardi Gras Association will be held October 3, 4 and 5.
